THE HEALTH BOARD

Failed to Get a Quorum last Night. A Symposium

BY SEVERAL LEADING MEMBERS.

Dr. Walden Makes a Statement, Backed up by Others, as to the Good Treatment of the Patients Both in and Out of the Pest House, There is no Need of a Relief Movement at all.

A meeting of the city health board was called for last night, but for some reason a quorum did not appear. The chairman, Doctor Stathers, Doctor Taylor, the other physician on the committee, Mr. Haller and Doctor Walden, the city health officer, waited for a long time for the other members to show up, and in the meantime they had a sort of symposium on matters connected with the smallpox.

Doctor Walden said there had been about forty-six cases. Of these there are but five who still require medical attention. Yesterday he took down the flag at 184 and 201 Eighteenth street, after properly disinfecting the places. Two nurses were also dis-charged.

The matter of the rumors and re-ports that some of the small per patients

ports that some of the smallpox patients had not had enough to eat, that owing to the destruction of bedding, etc, families were left destinte, and that there was need of public contributions for their relief, was brought up by Dr. Walden. Ho said this was all untrue, uncalled for and sensational. Some of these families were destitute, practically, before they had any sickness. The fact is, the doctor says, that in many cases the patients as well as the members of the families, were better fed and provided for by the city during the time they were quarantined than ever before. ports that some of the smallpox patients

provided for by the city during the time they were quarantined than ever before.

The orders given by the health officer for supplies include: bread, butter, milk, beef, bacon, ham, belogna, eggs, rice, prunes, raisins, dried apricots, dried peaches, canned tomatoes and corn, polatoes, orangos, bananas, lemons, sugar, coffee, tes, chocolate (for the sick), and all the seasonable vegetables that are considered wholesome for the people who are sick.

Such orders for the pest house and for other houses where the disease has existed have been filled by R. J. Huebel & Co., Chris, Sanders and C. K. Smith. Some of the meats were farnished by Hess & Lemmon and B. Gartner.

As to the bodding, etc., all articles ordered destroyed by the health officer have been replaced or a cash compensation given at a price agreed upon by the health officer and the owner before they were destroyed. In most cases the new goods are better than those destroyed were when new.

Dr. Walden suggests that if all families, whether within the region of probable infection or not, would thoroughly

Dr. Walden suggests that if all families, whether within the region of probable infection or not, would thoroughly disinfect their premises, by burning sulphur camilies, made for the purpose, and spraying chloride of lime about sinks, etc., it would be a good thing. Even if there were no danger of smallpox this would be a wise step.

The members of the committee suggest the idea that all manufacturers or other employers of labor should insist that all employes must be vaccinnated or lose their positions. A number of firms have done this, and required a certificate of vaccination from a reputable physician before allowing their men to return to work. If all would do this it would add much to the general safety. As to the instructions to secure a new

As to the instructions to secure a new pest house, the committee considered that there was no use to take such a step, as they think if a new one were to be secured there would be no inmates for it, under the present ordinance.

Mayor Caldwell was also talked to by an INTELLIGENCER reporter last evening. He said he did not see any real need of a relief movement, but if benevolent people desired to donate money he had people desired to donate money he had no objection to receiving it, and if any were sent to him he would not pay it out except on recommendation of the health officer or a member of thehealth committee, and on a certificate that the person to whom it was paid was needy and deserving.

DIED OF HIS INJURIES.

John Love, of East Wheeling, Who Was Hurt on the B. & O.

Yesterday John Love, son of Alex Love, who lives around the hill in East Wheeling, died from injuries received by being run over on the Baltimore & Ohio road on Seventeenth street near Woods, a week ago. Love was stealing a ride on a freight train, and was accested by friends on the sidewalk. He jumped off and alighted in such a way as to fall, and the wheels passed over one foot, crushing it badly. He was also crushed on the breast and cut on the head. It was thought he would lose one foot, but that was believed to be the extent of his injuries. He sank gradually, however, until Sunday, when after a consultation of doctors it was decided his leg should come off. The family objected so strenuously that the operation was deferred. Yesterday morning he died from his injuries. It is thought he was badly hurtinternally, and amputation would probably not have saved his life. Woods, a week ago. Love was stealing

SUES INSURANCE COMPANIES. Three Cases Growing Out of the Main Street Disnster.

S. M. Rice & Co. have, by their attorneys, Caldwell & Caldwell, filed in the circuit court suits to recover on their insurance policies on the stock damaged by water and smoke in their establishment on Main street, on account of the wreck and fire in the Johnson and Chapman buildings a few months are. They held three policies on their wholesale millinery stock, each being for \$2,000. The suits are, however, for \$1,905 each, owing to the fact that if the amount sued for reaches \$2,000 is doreign corporation may remove the case to the United States court. The three companies are the London, Liverpool and Globe, the Royal, of Liverpool, and the Æina, of Hartford. The Rice & Co. store, it will be remembered, was on the other side of the alley from the wrecked building, and as the fire itself did not reach it the issue seems very intricate. damaged by water and smoke in their
